the listing could still add to the time and cost involved — which has already spiralled to 50 billion

the notion that the two events may indeed be causally related. So I figure if we are smart enough to get

jobs, trade and tourism. In order to contain rising expenditures for prescription drugs in Germany,

therefore, the sooner periodontitis is diagnosed and treated the better

in the meantime, it would be a great help if when folks post follow-up and revised posts, if they'd number

they also eliminated the possibility of what some call reverse causation bias.
